Maniah -:

Thank you for submitting the manuscript, "Risk Assessment for Logistics Applications in Cloud Migration" to IJCCS (Indonesian Journal of Computing and Cybernetics Systems). With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL: <https://jurnal.ugm.ac.id/ijccs/author/submission/74567>
Username: maniah

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Agus Harjoko

Adequate & Quality of figures:
Good

Recommendation:
Accepted, revisions required before publishing

Comment:
This manuscript proposed a methodology to measure the risk of migrating to a cloud data centre. This alerts data managers to increased caution for possible security breaches during and after data migration. But, the authors should add newer articles to the reference list. It is suggested to add articles published from 2018 to 2022. It is written in the abstract that one of the findings is the success of identifying 17 indicators. This statement needs to be clarified because the 17 indicators are the result of modifications from sources [8, 9], and [12-14]. Therefore, these 17 indicators are part of the development method and are not the findings of this study. The conclusion section writes the stages of the research. This presentation does not answer the problems highlighted in this study. It is advisable to write a conclusion based on the discussion in the previous section. The suggestions section is not relevant without any limitation statement of the research.

Maniah -:

Your submission "Risk Assessment for Logistics Applications in Cloud Migration" for IJCCS (Indonesian Journal of Computing and Cybernetics Systems) has been through the first step of copyediting, and is available for you to review by following these steps.

1. Click on the Submission URL below.
2. Log into the journal and click on the File that appears in Step 1.
3. Open the downloaded submission.
4. Review the text, including copyediting proposals and Author Queries.
5. Make any copyediting changes that would further improve the text.
6. When completed, upload the file in Step 2.
7. Click on METADATA to check indexing information for completeness and accuracy.
8. Send the COMPLETE email to the editor and copyeditor.

Submission URL:

Abstrak

Peningkatan jumlah pusat data cloud disebabkan karena peningkatan jumlah perusahaan yang migrasi ke cloud computing. Banyak keuntungan yang didapat perusahaan ketika migrasi ke cloud, namun tidak sedikit juga kelemahannya. Keamanan dan privasi multitenancy merupakan tantangan penting bagi pengguna cloud migration. Penelitian ini mengusulkan cara menilai risiko yang kemungkinan akan muncul dalam proses cloud migration terhadap aplikasi bisnis logistik. Metode penelitian yang digunakan adalah semi kuantitatif.
