Manuscript Number:

Dear Maniah Maniah,

Dr Benfano Soewito submitted this manuscript via Elsevier's online submission system, Editorial Manager, and you have been listed as a Co-Author of this submission. Elsevier asks Co-Authors to confirm their consent to be listed as Co-Author and track the papers status. In order to confirm your connection to this submission, please click here to confirm your co-authorship:

<https://www.editorialmanager.com/jksucis/f.asp?i=184915&i=BDBBYH0J>

If you have not yet registered for the journal on Editorial Manager, you will need to create an account to complete this confirmation. Once your account is set up and you have confirmed your status as Co-Author of the submission, you will be able to view and track the status of the submission as it goes through the editorial process by logging in at <https://www.editorialmanager.com/jksucis/>

If you did not co-author this submission, please contact the Corresponding Author directly at bsoewito@binus.edu

Thank you,

Journal of King Saud University - Computer and Information Sciences

Manuscript Number: JKSUCIS-D-20-01152

A Systematic Literature Review: Risk Analysis in Cloud Migration

Dear Dr Soewito,

Thank you for submitting your manuscript to Journal of King Saud University - Computer and Information Sciences.

I have completed my evaluation of your manuscript. The reviewers recommend reconsideration of your manuscript following minor revision and modification. I invite you to resubmit your manuscript after addressing the comments below. Please resubmit your revised manuscript by Jan 17, 2021.

When revising your manuscript, please consider all issues mentioned in the reviewers' comments carefully: please outline every change made in response to their comments and provide suitable rebuttals for any comments not addressed. Please note that your revised submission may need to be re-reviewed.

To submit your revised manuscript, please log in as an author at <https://www.editorialmanager.com/jksucis/>, and navigate to the "Submissions Needing Revision" folder under the Author Main Menu.

Journal of King Saud University - Computer and Information Sciences values your contribution and I look forward to receiving your revised manuscript.

Kind regards,

Nasser-Eddine Rikli

Editor-in-Chief

Journal of King Saud University - Computer and Information Sciences

Editor and Reviewer comments:

Reviewer #1: The paper is well organized and deals with a very interesting topic.

However, I think authors must make a deep review of the english.

Please provide in a more clear way the main contribution of the paper, in the section of the state-of-the-art I was lost since there are so much information but for me it was unclear how to compare with respect to your contribution.

<https://mail.google.com/mail/u/1/?ik=e6ed420d06&view=pt&search=all&permmsgid=msg-f:1683958749836940683&simpl=msg-f:1683958749836...> 1/2

5/5/23, 12:10 PM Email Politeknik Pos Indonesia - Fw: Decision on submission to Journal of King Saud University - Computer and Information ...

Reviewer #2: The paper aims to provide an identification of risk types and risk components in cloud migration using the Systematic Literature Review (SLR) method. This research is very important but there are some loopholes such as:

- * The author must justify the SLR method choice, and highlight its importance.
- * Sections titles are not significant especially those of sections 3, 4 and 5.
- * In section 2, the author identifies 3 stages of his research, according to the SLR method, but in figure 1 there are 4.
- * Poor quality of figure 1.
- * End the question "What are the types of risks and risk components in cloud migration" , in section 2, by a question mark.
- * Center all table titles.
- * Columns titles of the table 1 must be reformulated.
- * Figure 2 is unnecessary because all its informations are already presented in table 2.
- * Reference number 16 must be completed.

Secara detil penulis menyiapkan perbaikan jurnal sesuai permintaan dari reviewer dalam tabel berikut ini:

RESPONSES TO EDITOR AND REVIEWERS' COMMENTS

The following are the actions the author has taken when revising the author's paper based on feedback from reviewers.

Reviewer No.	Reviewer Comments	Author Response and Action(s) Taken
#1	<p>The paper is well organized and deals with a very interesting topic.</p> <p>However, I think authors must make a deep review of the English.</p> <p>Please provide in a more clear way the main contribution of the paper, in the section of the state-of-the-art I was lost since there are so much information but for me it was unclear how to compare with respect to your contribution.</p>	<ul style="list-style-type: none"> • We have added a sentence in Section 1 paragraph 5, which explains the contribution of this paper: "In this study, this study is different from previous studies, where this study focuses more on the grouping of what is included in the types of risk in cloud migration, and wants to know what the risk components are, so that this can be used as a reference as components in assessing risk in cloud migration" • We also add an explanation regarding the state-of-the-art in section 4 (4.2) paragraph 1: "The results of surveys and literature studies on previous studies describe security problems in cloud computing [23], as well as several forms of threats and vulnerabilities to cloud computing [24]. Security is a big challenge in cloud computing [25]. The results of a survey conducted by [26] explained that in addition to technological readiness, human readiness, organizational support, and the environment in implementing cloud computing, things that are important to note are related to security and privacy, where the problems that often arise when migrating to cloud computing are Privacy [27], also emphasized by [28] that in cloud computing, security and privacy issues are significant challenges affecting its acceptance, so that it can hinder the adoption of cloud computing [29]. In addition, the challenge in cloud computing is the occurrence of security problems on the virtual layer [30], where virtual machines are a challenge for server consolidation in virtualized data centrally [31]. Survey results from [32] Denial of Service (DoS) attacks to distributed DoS

		(DDoS) attacks are also forms of security threats in cloud computing.
#2	The paper aims to provide an identification of risk types and risk components in cloud migration using the Systematic Literature Review (SLR) method. This research is very important but there are some loopholes such as:	
	<ul style="list-style-type: none"> The author must justify the SLR method choice, and highlight its importance. 	<ul style="list-style-type: none"> The author has added the reasons for choosing the SLR method and the importance of the SLR method. This is conveyed in section 2 paragraph 1: "With the SLR method, we can find out the trends of research topics that are of great interest to previous researchers, so that this can be used as a reference for further research. The importance of the SLR method in this research is that researchers can identify and analyze journals systematically according to the recommended stages related to journals about the types and components of risk in cloud migration"
	<ul style="list-style-type: none"> Sections titles are not significant especially those of sections 3, 4 and 5. 	<ul style="list-style-type: none"> The author has revised the titles under sections 3, 4 and 5 as follows: <ul style="list-style-type: none"> The title of section 3 was changed to Why migrate to the cloud? The title of section 4 (State-of-the-art of risk type and risk component on cloud migration) is removed because the contents are more suitable to be combined in section 2 (Research Methodology) The title of section 5 is changed to Result and discussion
	<ul style="list-style-type: none"> In section 2, the author identifies 3 stages of his research, according to the SLR method, but in figure 1 there are 4 	<ul style="list-style-type: none"> It has been adjusted to the stage in Figure 1
	<ul style="list-style-type: none"> Poor quality of figure 1. 	<ul style="list-style-type: none"> Quality of figure 1 has been increased
	<ul style="list-style-type: none"> End the question "What are the types of risks and risk components in cloud migration" , in section 2, by a question mark. 	<ul style="list-style-type: none"> It has been given a question mark at the end of the question sentence
	<ul style="list-style-type: none"> Center all table titles. 	<ul style="list-style-type: none"> Table titles are centered

	<ul style="list-style-type: none"> Columns titles of the table 1 must be reformulated. 	<ul style="list-style-type: none"> The title of table 1 has been changed according to its contents
	<ul style="list-style-type: none"> Figure 2 is unnecessary because all its informations are already presented in table 2. 	<ul style="list-style-type: none"> Figure 2 (The article selection process is based on selection criteria) has been deleted
	<ul style="list-style-type: none"> Reference number 16 must be completed. 	<ul style="list-style-type: none"> Reference number 16 has been completed writing.

A Systematic Literature Review: Risk Analysis in Cloud Migration

Dear Dr Soewito,

Thank you for submitting your manuscript to Journal of King Saud University - Computer and Information Sciences.

I am pleased to inform you that your manuscript has been accepted for publication.

My comments, and any reviewer comments, are below.
Your accepted manuscript will now be transferred to our production department. We will create a proof which you will be asked to check, and you will also be asked to complete a number of online forms required for publication. If we need additional information from you during the production process, we will contact you directly.

We appreciate you submitting your manuscript to Journal of King Saud University - Computer and Information Sciences and hope you will consider us again for future submissions.

Kind regards,
Nasser-Eddine Rikli
Editor-in-Chief
